What I use

Alex Koshelenko

Objective

Find a position, where I can leverage my strong networking skills, Linux and Windows administration experience, and problem-solving abilities. I am eager to join a friendly team that values continuous learning and embraces new technologies.

Professional information:

- Managed and supported the operation of computerized systems based on both Windows and Linux platforms, both in large-scale and smaller companies.
- I have experience working with various databases, such as MySQL, PostgreSQL, MongoDB, and Firebase.
- Utilized cloud solutions such as GCP and AWS to enhance system capabilities and optimize infrastructure.
- Implemented Agile principles in daily work to ensure efficient and collaborative project management.

The benefit I brought to the business was:

• Created and implemented the CRM system **crm-phbt.web.app** for managing the accounting of customer loyalty cards and the services provided to them.

• Developed a database to address typical issues faced by users.

• Implemented an automated workstation inventory system for users.

• Automated the process of creating new users on Linux.

Courses

EasyCode school	Front-end + Node.js
Google Cloud	Google Cloud: DevOps & Architect
	Click on link to look on my ***Profile on Google cloudskillsboost***
Additional skills	Web development

*As a little confirmation of my additional skills, several of my projects from **GitHub***

Repository	chatgpttgbot	phbt
Description	*Telegram bot that will help you ask questions to the chatGPT and get a response*	*The CRM system is designed for effective tracking of provided services, managing the bonus system, working with customer databases, and enhancing loyalty programs.*
Stack	JS, work with OpenAI APIs	Vue JS, Materialize
Repository	Chess	GitHub Search
Description	*Chess game (from YouTube)*	*Web app for search github repositories and collect it.*
Stack	React JS, TypeScript	React, TypeScript, Redux Toolkit, RTKQuery, Tailwind
Repository	TicTacToe	TodoList
Description	*Game Tic Tac Toe*	*To keep track of everything you need to do with the most important tasks*
Stack	React JS	React JS

Education

2014 – 2015	**Kharkiv National University of Radioelectronics,** *Design Engineer.* Master's degree in Laser and Optoelectronics Engineering.
2011 – 2014	**Kharkiv National University of Radioelectronics,** *Electronic Engineer.* Bachelor's degree in Optoelectronics
2007 – 2011	**Rubizhne O.Ye.Porai-Koshitsa Polytechnic College**, *Technical Electrician*.

Experience

02.2020 – 06.2022   **CDC «Pharmbiotest»,** *Computer systems Engineer.*

Main responsibilities:

- Installation of operating systems and software required for work on servers and workstations. Setting up software of servers and workstations.
- Support in working conditions of the software of servers and workstations.
- Registration of users of local network and mail server, assigns identifiers and passwords.
- Technical and software user support, advises users on the work and programs of the local network, develops instructions for working with software and transmits them to users.
